Alps Alpine to Showcase Advanced Industrial Solutions at electronica 2026
"Alps Alpine Goes Industry and Beyond"

Munich, Germany – October 29, 2026 – Alps Alpine today announced its participation in electronica 2026, the world's leading trade fair for electronics, taking place from November 10-13, 2026, at Trade Fair Center Messe München in Munich, Germany. Alps Alpine will welcome visitors in **Hall B4, Booth 311**, under the theme *"Alps Alpine Goes Industry and Beyond".*

At this year's exhibition, Alps Alpine will demonstrate how its core technologies are expanding beyond traditional markets to address the growing needs of industrial automation, smart manufacturing, logistics, and connected infrastructure.

The company's showcase will feature a range of innovative solutions, including:

- **Advanced sensing technologies** for machine monitoring, safety, positioning, and condition detection

- **Human Machine Interface (HMI) solutions** designed to improve operational efficiency and user experience in industrial environments
- **Asset tracking technologies** enabling real-time visibility, traceability, and management of valuable equipment and mobile assets
- **Integrated solutions** that support digitalization, automation, and smarter industrial operations

As industries worldwide accelerate the adoption of intelligent and connected systems, Alps Alpine is leveraging its expertise in sensing, connectivity, and user interaction technologies to help customers enhance productivity, reliability, and sustainability.

"*Alps Alpine Goes Industry and Beyond* reflects our commitment to bringing proven technologies and innovative solutions to new markets and applications," said Jörg Kortekamp, Director sales. "At electronica 2026, we look forward to demonstrating how our advanced sensing, HMI, and asset tracking solutions can help customers address the challenges of industrial transformation and unlock new opportunities for growth."

Visitors to the Alps Alpine booth will have the opportunity to explore live demonstrations and engage with technical experts to discuss specific application requirements and future collaboration opportunities.
